**TRANSPORT**

## Roads and Bridges

Macao has 336.9 kilometres of roads and highways, including 188.7 kilometres on the Macao peninsula; 84.6 kilometres on Taipa Island and Cotai; 43.1 kilometres on Coloane; 1.9 kilometres in New Urban Zone Area A and the bridge connected with New Urban Zone Area A; 8.7 kilometres in the Zhuhai-Macao border crossing area on the Artificial Island of the Hong Kong-Zhuhai-Macao Bridge; and 4.6 kilometres in the campus of the University of Macau.

Three bridges and a strip of reclaimed land link the Macao peninsula with Taipa island and Coloane island. Opened to traffic in October 1974, the Nobre de Carvalho Bridge (also known as the Macao-Taipa Bridge) is 2.5 kilometres long. The 4.4-kilometre Friendship Bridge was completed in April 1994. The 2.1-kilometre Sai Van (West Bay) Bridge was completed in December 2004 and opened to traffic in January 2005. In addition, the 900-metre Lotus Flower Bridge was completed in December 1999 and opened to traffic in March 2000. Linking the reclaimed area between Taipa and Coloane with Zhuhai City's Hengqin island and connected to the Guangzhou-Zhuhai Expressway, this bridge is the second land route between Macao and its neighbouring cities.

Macao has 448.9 kilometres of roads for motor vehicles. This figure includes 201.5 kilometres on the Macao peninsula; 142.2 kilometres on Taipa island and Cotai; 65 kilometres on Coloane island; five kilometres on Nobre de Carvalho Bridge; 10.2 kilometres on the Friendship Bridge; 4.2 kilometres on the Sai Van Bridge; 1.8 kilometres on the Lotus Flower Bridge; 3.7 kilometres in New Urban Zone Area A and the bridge connected with New Urban Zone Area A; and 15.3 kilometres in the Zhuhai-Macao border crossing area on the Artificial Island of the Hong Kong-Zhuhai-Macao Bridge. There are also 14 kilometres of roads of the University of Macau.

## Public Transport

Macao has a well-established public transport network connecting the Macao peninsula and the two islands. A variety of vehicles, including buses and taxis, are available for local residents and tourists.

### Public Bus Service

Public bus service in Macao is currently operated by two bus companies: Transportes Urbanos de Macau, S.A.R.L. (Transmac) and Sociedade de Transportes Colectivos de Macau, S.A. (TCM).

At the end of 2018, there were 915 buses in service, including 231 minibuses, 136 medium-sized buses and 548 large buses, on 84 routes. In 2018, a total of 214,621,192 passengers were served, an increase of 1.79 percent over the 2017 figure, covering a total distance of 49.17 million kilometres, an increase of 2.33

percent over the 2017 figure.

The Bus Service Notarial Contract signed by the Government with three bus companies expired on 31 July 2018. Since the Government still needed to negotiate with the bus companies regarding details of the provisions, the original notarial contract was temporarily extended for 15 months with effect from 1 August 2018.

The Government has approved the merger of Sociedade de Transportes Colectivos de Macau, S.A (TCM) and Macau Nova Era de Autocarros Públicos, SA. Therefore, the contract renewal only involved Transportes Urbanos de Macau, S.A.R.L. and TCM.

### **Sociedade de Transportes Colectivos de Macau, S.A.**

Sociedade de Transportes Colectivos de Macau, S.A. (TCM) (previously known as Companhia de Transporte de Passageiros entre Macau e as Ilhas) originally provided maritime passenger transportation services between Macao and the two islands. During the 1950s, it acquired several bus companies that served residents of Taipa and Coloane, and began to operate public buses. In 1986, Companhia de Transporte de Passageiros entre Macau e as Ilhas was restructured as TCM and became fully responsible for all public buses serving Macao and its islands.

In September 2012, the TCM took the lead in introducing the first new energy-saving and environmentally friendly CNG natural-gas bus in Macao. Currently, there are 69 natural-gas buses in total, accounting for 14 percent of the company's total fleet. In future, it will continue introducing new models and environmentally friendly buses in accordance with the slogan: "Shaping Eco-Cities for an Inclusive Green Economy"

In August 2018, the TCM merged with the Macau Nova Era de Autocarros Públicos, SA, offering a total of 57 bus routes, accounting for 64.04 percent of all bus routes in Macao. These 57 routes are operated by more than 500 vehicles, serving over 300,000 passengers on average per day, covering an average total distance of 70,000 kilometres daily.

### **Transportes Urbanos de Macau, S.A.R.L. (Transmac)**

Transportes Urbanos de Macau, S.A.R.L. (Transmac) was previously known as Companhia de Autocarros Fok Lei. Founded in 1952, it was restructured and changed its name to Transportes Urbanos de Macau in July 1988. It is the largest bus company in Macao. The company introduced the ISO Quality Management System in 2004 for overall management, making it the first franchised bus company in Macao to pass the ISO 9001:2015 Quality Management System.

Transmac has around 1,000 employees and a fleet of 411 air-conditioned buses that serve 33 bus routes covering Macao, Taipa and Coloane islands. During 2018, about 97 million passengers were carried and 22.89 million kilometres covered.

## Taxis

At the end of 2018, Macao had 1,503 licensed black taxis and 100 special taxis. There were 19,016 licensed taxi drivers.

## Traffic Management

### Transport Bureau

The Transport Bureau was established in May 2008. It is responsible for: studying, planning, promoting and implementing the Government's road transport policies; pursuing road improvements; regulation of vehicles; as well as installing, maintaining and improving transportation and pedestrian infrastructure.

### Vehicle Statistics

At the end of 2018, there were 240,443 vehicles on Macao's roads, including 124,078 motorcycles, 108,442 light vehicles and 7,923 heavy vehicles. During the year, 14,512 new vehicles were registered, 13.69 percent less than in 2017. Of these, 7,773 were motorcycles and 6,393 were cars.

### Traffic Monitoring

Traffic management and monitoring are essential for ensuring the safe and orderly operation of the transport system. The Government has installed closed circuit TV (CCTV) and radar speed monitoring systems to monitor traffic conditions on the Macao-Taipa Bridge and main roads.

The system includes 48 video cameras and 17 speed monitoring systems on and near the Friendship Bridge, 108 video cameras and 25 speed monitoring systems on and near the Sai Van Bridge and surroundings, and 14 video cameras and four speed monitoring systems on and near the Ponte Governador Nobre de Carvalho. Also, 596 traffic monitoring systems (including on Area A and the Artificial Island of the Hong Kong-Zhuhai-Macao Bridge), 41 speed monitoring systems, 62 red-light violation detection systems, eight road junction comprehensive detection systems and 19 detection locations have been installed in various locations.

According to the Public Security Police, during 2018, the monitoring systems identified 20,230 cases of highway speeding, 933 cases of bridge speeding, 773 cases of jumping red lights, and 18,754 cases of illegal parking identified by the illegal parking monitoring systems.

## Parking

As at 31 December 2018, Macao had 53 public car parks, which together provided 22,374 parking spaces for light vehicles, 727 spaces for heavy vehicles, and 14,708 spaces for motorcycles.

<b>Public Car Parks in Macao</b>	
<b>Name of car park</b>	<b>Available parking spaces</b>
Pak Lane Car Park	507 light vehicles

Patane Municipal Market Complex Car Park	116 light vehicles, 194 motorcycles
New Wholesale Market Car Park	230 light vehicles, 198 motorcycles

As at 31 December 2018, there were 8,379 parking meters for light vehicles, of which 176 were one-hour parking meters, 6,402 were two-hour parking meters and 1,801 were four-hour parking meters. There were 2,270 non-metered parking spaces. There were 2,405 parking meters for motorcycles, of which 1,992 were two-hour parking meters and 413 were four-hour parking meters. There were 36,316 non-metered parking spaces for motorcycles.

## Road Safety

A Road Safety promotional campaign held in 2018 was jointly organised by the Transport Bureau, Public Security Police, the Legal Affairs Bureau and the Education and Youth Affairs Bureau. It publicised the importance of obeying traffic regulations, to strengthen the understanding of laws and sense of road safety among local residents, and thus reduce the number of traffic accidents.

The Transport Bureau and the Traffic Department of the Public Security Police held workshops and talks related to road safety in schools, community centres, non-governmental organisations and private organisations, with the aim of reinforcing residents' understanding of road safety through long-term education efforts.

During 2018, a total of 113 schools and organisations participated in the road safety seminars and workshops co-organised by the Transport Bureau and Traffic Department with 14,662 participants.

## Cross-border Traffic

### Cross-border Land Routes

Three land routes link Macao and mainland China: the Border Gate, Lotus Flower Bridge checkpoint (Cotai checkpoint), and the Hong Kong-Zhuhai-Macao Bridge checkpoint, which commenced operations on 24 October 2018.

During 2018, there were 22,152,467 visitor arrivals by land, an increase of 13.2 percent over the previous year's figure. Of these, 18,224,963 entered via the Border Gate; tourists from mainland China and Hong Kong represented 89.6 percent and 6.8 percent of the total, respectively. The number of visitors who arrived via the Cotai checkpoint was 2,858,633. During the year, there were 24,603,356 arrivals of Macao residents via the Border Gate, 1,011,487 via the Cotai checkpoint and 192,827 via Hong Kong-Zhuhai-Macao Bridge checkpoint.

### Cross-Border Marine Transportation Services

The Outer Harbour Ferry Terminal and Taipa Ferry Terminal provide cross-border transportation services for passengers travelling between Macao and Hong Kong and mainland China. Scheduled passenger ferries to Hong Kong and mainland China are operated by the Shun Tak China Travel — Companhia de Gestão de Embarcações (Macao), Limitada; Far East Hydrofoil Company; Hong Kong-Macau Hydrofoil Company; Shun Tak – China Travel Macau Ferries Limited; Yuet Tung Shipping Company; and Cotai Waterjets (Macao) Limited.

## Outer Harbour Ferry Terminal

The Outer Harbour Ferry Terminal, which commenced operations in 1993, is one of Macao's most important checkpoints. The terminal operates around-the-clock providing maritime passenger transportation services between Macao and various places including Sheung Wan, Tsim Sha Tsui, Tuen Mun and Hong Kong International Airport in Hong Kong, and Fuyong and Shekou in Shenzhen. Moreover, it also provides helicopter transportation services between Macao and Hong Kong or Shenzhen.

The terminal has a total floor area of 65,000 square metres, and provides 14 berths and a helicopter pad on its rooftop. The main building is a three-storey building, with the first floor as arrival floor, the second as departure floor and the third as food and beverage, shopping and passenger waiting area.

## Taipa Ferry Terminal

As planned, the Taipa Ferry Terminal commenced operation on 1 June 2017. It occupies 200,000 square metres, with 16 berths, three multi-functional berths for ferries and a helicopter pad on its rooftop. The Terminal provides maritime passenger transportation services between Macao and various places including Sheung Wan, Tsim Sha Tsui, Tuen Mun and Hong Kong International Airport in Hong Kong, Fuyong and Shekou in Shenzhen, to provide leisure cruise services, with the ground floor as the arrival floor, the first as the departure floor and a food square in the west of the ground floor.

## Inner Harbour Ferry Terminal

The Inner Harbour Ferry Terminal has two berths, and stopped providing maritime passenger transportation services between Macao and Wanzai in Zhuhai on 17 January 2016.

## Maritime Passenger and Cargo Transportation

During 2018, there were 111,186 scheduled ferry sailings between Macao and Hong Kong, and 20,554 scheduled ferry sailings between Macao and mainland China.

During 2018, 10,355,396 passengers arrived in Macao by sea, a decrease of 7.84 percent compared with the 2017 figure. Of these, 6,109,199 entered Macao via the Outer Harbour Ferry Terminal, and 4,246,197 via the Taipa Ferry Terminal.

In 2018, 93,926 containers or 138,639 TEUs (twenty-foot equivalent units) were shipped in and out of Macao by sea, representing increases of 4.13 percent and 6.81 percent, respectively, on the 2017 figures.

Yuet Tung Shipping Co., Ltd commenced operating regular sightseeing maritime routes at the Inner Harbour Ferry Terminal on 25 September 2018. Shun Tak China Travel Ship Management (Macao) Limited commenced operating charter services of Macao Aquatic Trek at Taipa Ferry Terminal and Coloane Pier on 23 October 2018; it also began operating regular sightseeing maritime routes at Taipa Ferry Terminal and Coloane Pier on 8 December 2018.

<b>2018 Sightseeing Maritime Routes</b>		
	<b>No. of Sails</b>	<b>No. of Passengers</b>
September 2019	15	636
October 2019	75	3,615
November 2019	56	1,091
December 2019	83	1,671

## Cross-Border Helicopter Services

Helicopters are the most convenient way to travel between Macao and Hong Kong and between Macao and Shenzhen. A Hong Kong-Macao helicopter passenger transportation service was inaugurated in 1990. A Shenzhen-Macao helicopter passenger transportation service was launched in 2002. Operated by East Asia Airlines, the service reduced the travelling time between Hong Kong and Macao to only 15 minutes. There are 40 and six daily helicopter flights between Macao and Hong Kong and between Macao and Shenzhen, respectively. The helicopter service operates from 10 am to 11 pm. In 2018, there were 13,089 helicopter flights, representing an increase of 8.1 percent.

## Ports

### Outer Harbour

Located on the east coast of the Macao peninsula, the Outer Harbour is designated for scheduled high-speed ferries between Macao and Hong Kong and Shenzhen. Its watercourse is 120 metres wide and 4.4 metres deep.

### Inner Harbour

Located on the west coast of the Macao peninsula, the Inner Harbour has many piers for loading and discharging cargo, plus Pier 11A, the ferry terminal, used by

passenger ferries licensed by the Marine and Water Bureau. The South Sampan Pier between Piers 8 and 9 is used by crewmembers of ships berthed in the Inner Harbour who hold Macao SAR Resident Identity Cards, or Portuguese Citizen Cards, or are authorised to land and depart by the relevant government authority. The South Sampan Pier also allows vessels travelling to and from Wanzai, Zhuhai, to berth; these carry flowers and flower farmers, and arrivals are processed through a customs inspection point. The North Sampan Pier between Inner Harbour Ponte 16 and Pier 21 is used by crewmembers of ships berthed in the Inner Harbour who hold Macao SAR Resident Identity Cards, or Portuguese Citizen Cards, or who are authorised to land and depart by the relevant government authority, with prior notice to the Macao Customs inspection point. The Inner Harbour's approach channel is 60 metres wide, and its fairway is 55 metres wide and 3.5 metres deep.

## Taipa

The Taipa Ferry Terminal is situated on the north-eastern tip of Taipa island, and is exclusively for scheduled high-speed ferries shuttling between Macao and Hong Kong, and between Macao and the Pearl River Delta area. Its fairway is 120 metres wide and 4.4 metres deep.

## Ka Ho Harbour

Located on the northeast shore of Coloane island, Ka Ho Harbour consists of the Fuel Oil Terminal, Cement Terminal, Ka Ho Container Port, and Power Plant Terminal. Its approach channel is 75 metres wide and 4.4 metres deep.

## Ka Ho Container Wharf and Fuel Oil Terminal

Phase One of Ka Ho Container Wharf commenced operations in December 1991. With a total construction area of 49,524 square metres, it includes a container wharf, container yard and warehouses. At present, it has two berths, of 135 metres and 171.4 metres in length; a 10,428-square-metre cargo working area; a 23,828-square-metre container yard; and 2,850 square metres of cargo warehousing space. The terminal's annual handling capacity is 100,000 TEUs.

In 2018, Ka Ho Harbour handled 19,234 inbound TEUs (twenty-foot equivalent units) and 20,243 outbound TEUs; both figures include re-exports.

The Fuel Oil Terminal commenced operation in June 1995. It can store a wide variety of fuel oil imported into Macao, and can simultaneously load and unload two fuel-carrying vessels. It has 14 storage tanks with a combined capacity of 86,000 cubic metres.

## Marine and Water Bureau

According to By-law No. 14/2013 the Organisation and Operation of the Marine and Water Bureau renewed by By-law No. 23/2015 and No. 30/2018, the Marine and Water Bureau is a department with authorities and duties responsible for exercising maritime authority, promoting the development of maritime activities, and coordinating water resources management and water supply.

To promote and assist economic development of the fishery sector, in 2007 the Government promulgated By-law No. 3/2007 to establish the Fisheries Development and Support Fund. The Fisheries Development and Support Fund started to receive applications on 30 April 2007. The loans approved by the end of 2018 totalled around 69.98 million patacas.

## Ships

### Maritime Registration

By law, all vessels engaged in economic activities – including freighters, passenger vessels, fishing boats and auxiliary boats – must be registered with the Marine and Water Bureau and the Commercial and Movable Goods Registry. The registration procedures are designed to verify conformity with official requirements concerning technology, safety and environmental protection. Maritime registration is a prerequisite for vessels seeking commercial registration. There were 314 registered vessels at the end of 2018, including five that were newly registered during the year.

In addition, maritime and commercial registration is required for vessels over 2.5 metres in length that are used for non-profit-making purposes, such as water sports, fishing or recreational activities. These include ocean-going, coastal, inshore, channel and river pleasure boats. There were 100 registered vessels in this category at the end of 2018, including eight new registrations.

### Seafarer Registration

According to the law, Macao residents aged 18 or above may apply for seafarer registration with the Marine and Water Bureau. All Macao residents who wish to conduct professional maritime activities on commercial vessels, auxiliary boats or fishing boats are required to register with the Marine and Water Bureau beforehand. At the end of 2018, a total of 118 people held seafarer's books issued by the Marine and Water Bureau.

## Maritime Training School

The Maritime Training School is Macao's only nautical education institution. Its principal objectives are to provide theoretical and practical training in maritime subjects and harbour management, as well as related scientific knowledge.

Most of the training school's students are staff members from the Marine and Water Bureau, Macao Customs Service, Fire Service and Public Security Police Force, as well as sailors, fishermen and nautical athletes in Macao. The training school also provides after-school and summer vacation activities for youngsters.

## Government Dockyard

The Government Dockyard is a department under the Marine and Water Bureau. As well as shipbuilding and ship repairs, it is responsible for maintaining and repairing government vehicles, verifying their status and inspecting them, handling newly purchased vehicles, as well as making and installing vehicle identification plates. At present, most of the vessels built and repaired at the Government Dockyard belong to the Marine and Water Bureau and Macao Customs Service.

In 2018, the Government Dockyard built eight new vessels – a 25-metre rescue ship, two 16-metre steamboats, one 17-metre hydrographic vessel, two 19-metre tugboats, one 11-metre hydrographic vessel and one 38-metre engineering vessel for the Marine and Water Bureau. It also carried out 281 vessel maintenance projects, 171 of which were completed. The shipyard carried out 2,268 projects concerning examination, maintenance and repair of 2,685 vessels.

## Safety of Water Supply

To ensure the safety of water supplies in Macao and effectively manage water resources more effectively, the Maritime Administration was renamed the Marine and Water Bureau on 28 July 2013, and established the Water Resources Department for coordinating supplies of drinking water, recycled water and raw water; studying and establishing water resources management policy, system, and measures; and promoting development and reasonable utilisation of water resources. The Marine and Water Bureau also cooperated with various sectors to build a water-saving city through development and application of water technologies, and publication and promotion of water-saving activities.

The bureau also purchases raw water from mainland China and monitors the quality and quantity of the raw water, to ensure the quality in Macao meets the safety standard. The bureau also monitors the operations of the public water supply services company.

## Civil Aviation

### Civil Aviation Authority

The Civil Aviation Authority was founded on 4 February 1991, in accordance with Decree-Law No. 10/91/M dated 4 February 1991. It is constituted as a public institution under the Secretariat for Transport and Public Works, and it enjoys autonomy over administration, finances and property. It is responsible for directing, controlling and monitoring all civil aviation activities in Macao, and the operations of all aircraft registered in Macao.

### Aviation Service

To implement its “Open Skies” policy, the Government has adopted a series of measures to enhance Macao’s civil aviation infrastructure network. Every effort has been made to attract additional investment from domestic and foreign airlines, to promote the use of Macau International Airport, and to enhance the development of passenger and cargo transportation.

To increase cooperation with the international aviation community, the Government will continue to forge new air services agreements with countries around the world. By 31 December 2018, Macao had initialled air services agreements with 50 nations and regions, 41 of which had been officially signed.

As at 31 December 2018, three airlines were registered in Macao and providing flight services: Air Macau, Sky Shuttle and Macau Jet International.

The fleets and scheduled flight services of the three companies were as follows:

Airline	Fleet	Destinations
Air Macau	4 x Airbus A319, 3 x Airbus A320, 10 x Airbus A321	Shanghai (Pudong, Hongqiao), Beijing, Hangzhou, Xiamen, Nanjing, Ningbo, Chengdu, Nanning, Hefei, Chongqing, Taiyuan, Tianjin, Zhengzhou, Guiyang, Changzhou, Taipei, Kaohsiung, Bangkok, Da Nang, Hanoi, Seoul, Jeju, Tokyo, Osaka, Fukuoka, Da Nang, and Hanoi.
Sky Shuttle (Helicopter service)	3 x Agusta AW139	Hong Kong, Shenzhen
Macau Jet International (Commercial Charter Services)	1 x Dassault Falcon 2000LX 1 x Agusta AW139	Global destinations

The numbers of pilots licensed by the Civil Aviation Authority, as at 31 December 2018, were:

Airline	Number of licensed pilots
Civil Aviation Authority	1
Air Macau	201
Sky Shuttle	21
Macau Jet International (Commercial Charter Services)	9
<b>Total</b>	<b>231</b>

Macao International Airport is located at the eastern end of Taipa island and neighbouring waters. The terminal building was constructed on a rock-cut platform

at Ponta da Cabrita, while the apron was built on reclaimed land. East of the apron, the air-traffic control building, control tower and ancillary fire station are on Kia Kiong Islet. The runway is on an artificial island linked to the apron by two taxiway bridges.

The main fire station is on the runway island, next to the oblique taxiway. The airport is within easy reach of the Macao peninsula, the Outer Harbour and Zhuhai via motorway, the Friendship Bridge and the Lotus Flower Bridge. Commuting time from each of these points is less than 20 minutes.

The Macau International Airport handled 8,261,412 passengers during 2018, 15.3 percent more than in 2017. Its cargo volume was 41,508 tonnes, representing an increase of 10.7 percent. A total of 65,779 flights took off or landed, representing an increase of 12.4 percent.

The number of private and commercial air charters increased from 2,938 in 2017 to 3,170 in 2018, representing an increase of eight percent.

During 2018, 3,276,220 visitors arrived via the airport.

## Air Traffic Control

Since it opened in 1995, the airport's air traffic control system has maintained excellent standards of service efficiency and flight safety. Air traffic control facilities include secondary surveillance radar, ground radar and the Automatic Terminal System. Telecommunications facilities include AMHS, while air-ground communications facilities include a UHF radio station, and navigation facilities include a Doppler VHF omnidirectional radio range (DVOR) apparatus and Instrument Landing System.

The zone with Macao's air traffic control service is classified as Category-C under International Civil Aviation Organization (ICAO) standards. The keyhole-shaped air traffic zone is centred on Macau International Airport. It extends up to an altitude of 3,000 feet and a radius of five nautical miles. The western boundary is a straight line parallel to and three nautical miles from the runway. To the south, the zone forms a rectangle five nautical miles wide and extending southwards for 10 nautical miles.

Macao's air traffic zone lies between the Hong Kong and Guangzhou flight information zones. All aircraft, including helicopters entering Macao airspace, are supervised by the airport control tower. Arriving and departing aircraft can land or take off from both the southern and northern approaches. The mainland China authorities control air traffic to the north of Macao's air zone, while traffic to the south is controlled by the Civil Aviation Department of Hong Kong. Since traffic in the Pearl River Delta airspace is busy and complex, the air-traffic control authorities of Macao, mainland China and Hong Kong must work closely to ensure the safety and efficiency of air traffic control in Macao and the neighbouring air zones.

## Aircraft Noise

Macau International Airport was constructed offshore and far from residential communities, avoiding the need to install soundproofing. However, to protect Zhuhai from noise pollution caused by northbound flights taking off from the runway, aircraft are not allowed to pass the 231-degree radial line of Zhuhai's Jiuzhou omni-directional beacon station.

## Aviation Security

Under Decree-Law No. 36/94/M issued on 18 July 1994 and ICAO regulations, the security systems of civil aviation are intended to ensure the safety, normal operations and efficiency of international civil aviation activities in Macao. Security measures and procedures are essential to protect passengers, crew, airport staff and the public, as well as ensuring the normal, uninterrupted operations of aircraft, facilities and equipment.

Responsibility for Macao civil aviation security is distributed among the Civil Aviation Authority, the Unitary Police Service, the Macao Customs Service, the Public Security Police, the Judiciary Police, the Marine and Water Bureau, the Macau International Airport, the SEMAC Security Company employed by the Airport, aviation companies and other airport departments.

The airport security company is responsible for implementing the security measures and procedures formulated by the airport operator, and ensuring that the security measures and procedures comply with the security requirements of aviation in Macao and the International Civil Aviation Organization (ICAO) standards and recommendations. Besides, the company provides professional training, certified technicians and advanced security equipment to perform security checks on passengers, baggage and cargo.

## Macau International Airport Company

Macau International Airport Company (CAM) has been appointed by the Government to operate Macau International Airport. It was responsible for the airport's construction, and it is now responsible for its operation. The Government approved the company's application in 2001 to extend its franchise by a further 25 years, to 2039.

# MAINTENANCE

The Government Dockyard is a department under the Marine and Water Bureau. Besides ship building and repairing, it is also responsible for servicing and repairing government vehicles, verifying their status and inspecting them, handling newly purchased vehicles, and making and installing vehicle identification plates. At present, most of the vessels built and repaired at the Government Dockyard belong to the Marine and Water Bureau and Macao Customs Service.
